Description

Flat in Eco green project in Paphos 3 bedroom apartment in Chloraka. 100 steps from the supermarket 100 steps from the school Garden respects nature, pursues the balance between city life and nature, and explores the architectural style of future cities. The project is full of green plants, natural stone, as many natural elements as possible, and a water spray mist system, creating a healthy, green, comfortable, and harmonious natural living environment. Lots of green plants naturally regulate the building's temperature, keeping it warm in winter and cool in summer, while integrating as much natural light and landscape as possible. According to tests, green buildings can save 40-50% of energy compared to traditional buildings, and greenhouse gas emissions are 62% less than regular buildings. Garden, a natural residence in the bustling city, feels half-hidden in the woods. Living in this oasis, you wake up each day in oxygen-rich air and gentle sunshine, a freshness that energizes every cell in your body. At night, you return home and fall asleep in quiet nature. Research shows that people who live in green, well-ventilated homes have cognitive scores 101% higher and sleep an average of 46 minutes longer per night. Better indoor air quality can increase productivity by 8%. The lobby on the first floor is a shared space, a natural miniature green expo, where residents of the oasis can express their feelings, chat, and talk about their favorite plants. Each apartment has an exclusive terrace with your favorite green plants. Every evening, unwind from the day's fatigue with a cup of coffee or drink, accompanied by a gentle sea breeze. This green space can also be a personal garden—a place to read, browse, or simply relax. It's a sanctuary for healing and reflecting, where you can share your joys, sorrows, and dreams. The building's comprehensive security system ensures a safe paradise. Prices from + VAT
